EDUCATION

Bachelor of Technology, Jai Narain College of Technology - 9.31/10	2023
Intermediate (Class XII), AVMD Institute - 81%	2019
Marticulation (Class X), Agra Vanasthali Vidyalaya - 10 CGPA	2017

SKILLS

Programming Languages

Java, Python, SQL

Web Technologies

HTML5, CSS3, JavaScript

Subjects

Data Structures and Algorithms,
Database Management System,
Computational Mathematics

Frameworks

Django

Soft Skills

Figuring Out, Creativity, Mentoring

INTERNSHIP EXPERIENCE

Data Analyst & Operations Intern, Newton School April 2021 – November 2021

- Assisted in reviewing and writing SQL queries.
- Created a new performance evaluation funnel for operations team to monitor the health of clients and stage that increased the productivity of the team.
- Redesigned and updated automated trackers using Django that can be used to take data from database and simulate results to the team.

Technical Content Engineer Intern, Edureka

- Creating content around data structures, algorithms, Python and Java on various difficulty levels.
- Assisted in managing the data and question creation pipeline for client projects.
- Reviewing company's existing courses and projects for technical errors and ensure that they follow suitable guidelines.
- Working on project questions submitted by remote clients who are pursuing the course and responding to queries/issues from candidates pursuing course of the company.

PROJECTS

Expense Manager, Expense Manager with Visualizer [🔗](#)

- Robust, Easy UI Expense Manager with full capabilities to map the income sources and expenses as well visualize it via charts and graphs.
- Built Authorization from Scratch with Ajax toolkit tool to make simpler and robust UI, implemented ajax search panel with quick refresh. Used Chart.js to dynamically visualize data to users.
- Built using Django, JS, Ajax, HTML, CSS, Postgres

DevSearch, Community for Software Developers all around the world

- A community built for software developers/Engineers where we can update about projects, recent tech achievements, new skills and people with similar interest can work together!
- Built entirely on Django framework with features like Authentication / Authorization using google, Chatting, Notifications, CRUD operations, commenting and much more!
- Used HTML / CSS/ Bootstrap / JS for front end.
